

Enjoy Full Home Zone Control with Wireless Temperature & Humidity Sensors

ZONE CONTROL

Choose the amount of Heating & Cooling you would like in each Room

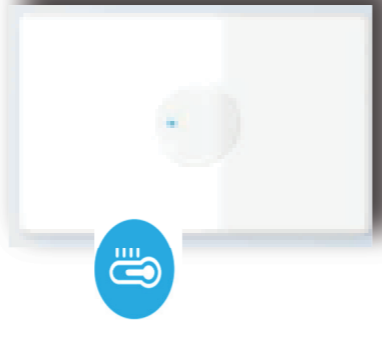

SMART WIRELESS SENSOR CONTROL

When Some Rooms get to Hot or Cold, The Smart Control System will adjust the Airflow to Maintain temperature and save Energy

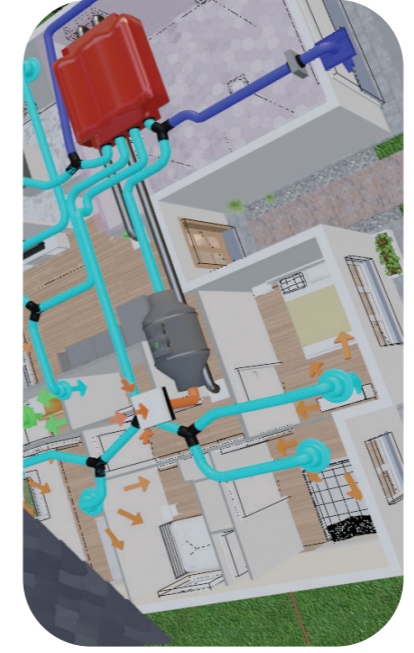

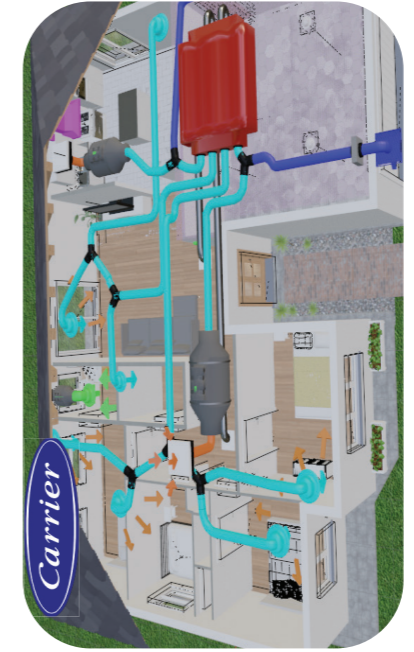

- You can choose up to 5 x Zones in your home
- Split your lounge & Dining onto separate zones
- Split your bedrooms onto separate zones
- You can put 2 x rooms on to 1 x zone
- You can choose what percentage of air you would like into each zone 1 - 100%
- Each zone comes with a wireless sensor that goes on the wall in that room
- Each wireless sensor gives temperature & humidity readings every 4 minutes
- You can schedule and set zones to open & close based on time, temperature or humidity
- You can control this 24/7 from anywhere in the world

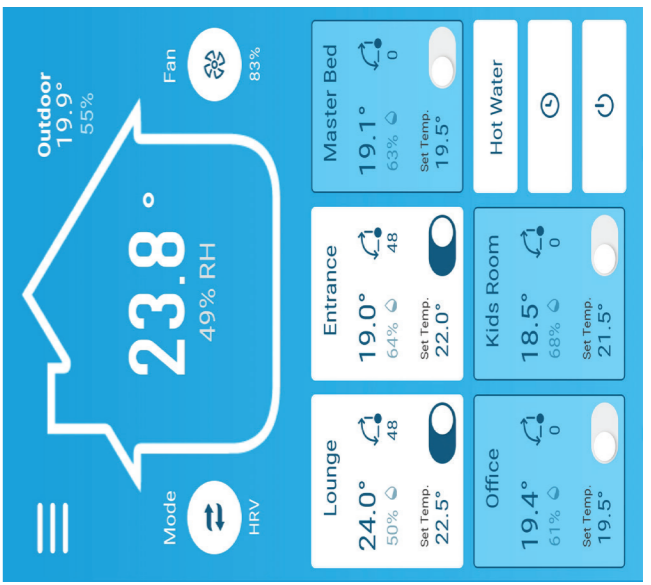

Live temperature & Humidity readings every 4 minutes

Wireless Temperature & Humidity Sensor

The Amazing New “Signature Series” Your (All in One) Total Home Centrally Ducted Air Conditioning & Ventilation Solution Plus Hot Water Heating

Full Smart Control System
